↓ -10.00%

Internal Resistance (Average)

1.64 Ω

⚠ Warning - Check Soon

--- Predictive Maintenance Prognose ---

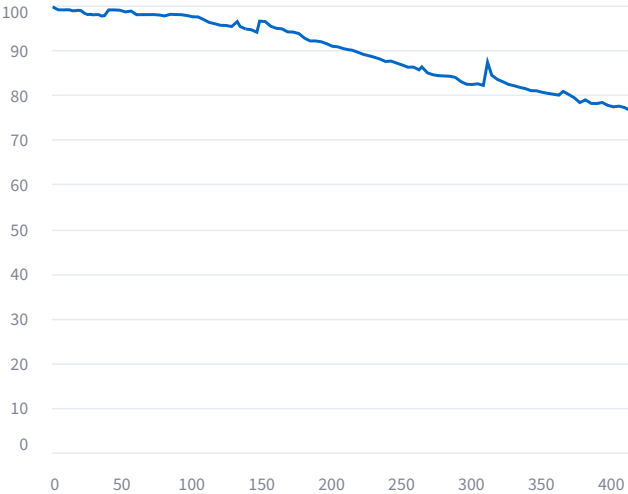

Remaining cycles until 80% SoH: approx. 220 Cycles

Estimated End Cycle: approx. 435

Remaining battery life:

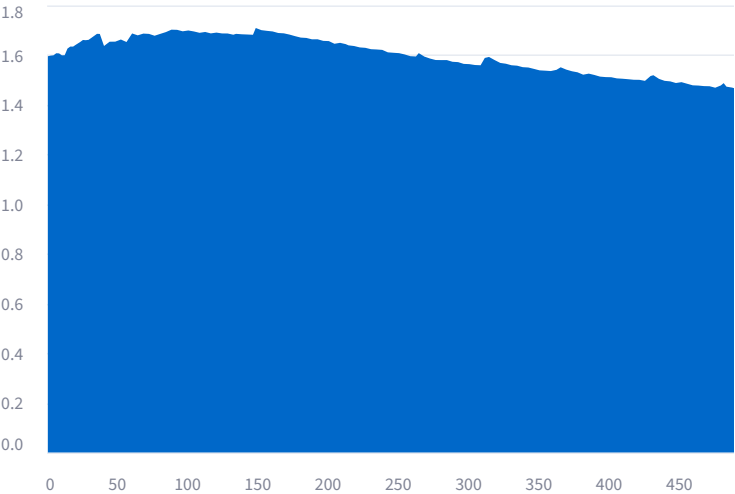

Capacity Loss (SoH Trend)

Shows how the State of Health (SoH) has evolved over discharge cycles. A downward trend indicates degradation.

Internal Resistance Rise

Shows the average internal resistance over cycles. An increasing trend can indicate worsening battery health.
